4.1. The Arcex Platform is a non-custodial software interface. Arcex does not hold, control, or custody any of your funds, private keys, or Digital Assets. Your interactions occur directly with third-party protocols.

4.2. **Third-Party Protocols:** The Services provide an interface to the **0x Protocol** (for spot trading), **Orderly Network** (for perpetual futures), **Hyperliquid Protocol** (for perpetual futures and spot trading), **XYZ Protocol** (for trading on Hyperliquid), the **Derive Protocol** (for options and derivatives), and the **Polymarket Protocol** (for prediction markets). Your use of these protocols is at your sole risk and is subject to their respective terms and conditions. Arcex is not a party to any transaction you execute on these protocols.

4.3. **No Fiduciary Duty:** Arcex is a technology provider only. We are not your broker, agent, or advisor and have no fiduciary duty to you. We do not provide financial, investment, legal, or tax advice.

## 5. USER ACCOUNT AND SECURITY

5.1. **Your Responsibility:** You are solely responsible for all activities that occur under your account and for the security of your wallet, private keys, and passwords. Any loss or compromise of this information may result in the permanent loss of your Digital Assets.

5.2. **Mobile Security:** If you use our mobile application, you are responsible for securing your device. The “Transfer Account” feature must be used by you to migrate keys to a new device. Arcex shall not be liable for any loss of funds or access resulting from a lost or compromised device or your failure to properly manage account transfers.

## 6. RISK DISCLOSURE

Trading Digital Assets, including spot, perpetual futures, and options, as well as participating in prediction markets, is extremely risky. You acknowledge and accept the inherent risks, including but not limited to:

- **Market Volatility:** The value of Digital Assets can fluctuate dramatically. You may lose your entire investment.
- **Leverage Risk:** Trading perpetual futures and options often involves leverage, which can amplify both gains and losses. A small market movement can have a disproportionately large effect on your funds, and you could lose more than your initial collateral.
- **Liquidation Risk:** Leveraged positions are subject to liquidation if you fail to maintain required margin levels. This can result in the forced closure of your positions and the total loss of your collateral.
- **Options and Derivatives Risk:** Trading options and other derivatives carries unique risks, including the risk of expiration, complex pricing models, and settlement risk. These instruments are volatile and suitable only for sophisticated users.
- **Prediction Market Risk:** Participating in prediction markets is inherently unpredictable. You may lose some or all of the funds you commit to prediction market positions. Prices can change, and outcomes are not guaranteed.
- **Smart Contract Risk:** The Services interact with third-party smart contract protocols. These protocols may contain bugs, exploits, or vulnerabilities that

could result in the total loss of your funds. Arcex has no control over and is not responsible for the security or integrity of these third-party protocols.

- **Regulatory Uncertainty:** The legal and regulatory landscape for Digital Assets, derivatives, and prediction markets is constantly evolving. Changes in regulations could materially impact the Services and your ability to use them.
- **No Fiduciary Duty:** Arcex provides a technology interface and does not act as your advisor. All trades and prediction market positions are your own, and you are solely responsible for evaluating the risks.

## 7. PREDICTION MARKETS

7.1. **Interface to Polymarket:** The Arcex Platform provides an interface to the Polymarket Protocol, a decentralized prediction market platform. Arcex is not a market maker, does not set prices, and is not a party to any prediction market position you take.

7.2. **Market Rules:** All prediction market positions are subject to the rules and procedures of the Polymarket Protocol. You are responsible for understanding these rules before taking any position.

7.3. **Responsible Participation:** Arcex encourages responsible participation in prediction markets. You should never commit more funds than you can afford to lose. Prediction markets involve substantial risk, and you should carefully consider your financial situation before participating.

## 8. FEES AND TAXES

8.1. **Fees:** Fees for trades, prediction market transactions, withdrawals, and network transactions (gas) are charged by third-party protocols or blockchain networks. You are responsible for all such fees. Arcex, at its sole discretion, may choose to subsidize or pay for certain fees on your behalf. Arcex is under no obligation to offer such benefits and may modify or terminate them at any time without notice.

8.2. **Taxes:** You are solely responsible for determining, reporting, and remitting all applicable taxes arising from your trading and prediction market activities.
